

To Whom It May Concern:

Jago was a summer intern at Syos from 17/11/2025 to 27/02/2026, and I was his manager in my role as Mechanical Lead. Jago was an absolute pleasure to work with. Not only was he always willing to take on any task, but he consistently saw them through to completion without requiring follow-up. I was able to assign him multiple tasks with differing priorities, and he managed them all effectively and independently.

Whenever an issue arose, Jago would not simply identify the problem and stop there. Instead, he would say, "We ran into issue X, but I think we could approach it through A or B." He consistently came prepared with thoughtful solutions and maintained a positive attitude, which made working through challenges significantly easier for the entire team.

I have told Jago that he has a standing job offer at Syos — I would hire him again at any time without hesitation. He is the kind of engineer who can contribute across design, manufacturing, and testing. Whatever the task, he gives it his full effort — and that dedication is often the most important quality of all. It is clear that he genuinely enjoys solving problems, collaborating with others, and pushing the boundaries of what is possible.

I look forward to seeing the engineer Jago becomes with 5, 10, or 15 years of experience under his belt. He is already outperforming some engineers with five or more years of experience, and he has only recently graduated.

All the best,

Jake Tisdale 

Mechanical Department Lead
